80/tcp open     http    syn-ack ttl 63 Apache httpd 2.4.41 ((Ubuntu))
|_http-title: Did not follow redirect to http://forge.htb
|_http-server-header: Apache/2.4.41 (Ubuntu)
| http-methods:
|_  Supported Methods: GET HEAD POST OPTIONS
Service Info: OS: Linux; CPE: cpe:/o:linux:linux_kernel
```

/etc/hosts

80 redirects to `forge.htb`. So adding it to `/etc/hosts`

[[Pasted image 20210922093500.png]]

Website

[[Pasted image 20210922093610.png]]

Interesting “Upload an image” button top right

[[Pasted image 20210922094015.png]]

Looks like you can either provide file or enter URL.

Uploading images works, whereas uploading a cmd shell for example doesn't.

If you try and choose to upload from URL the box will callback to you:

```
> sudo ncat -lnvp 80
[sudo] password for patrick:
Ncat: Version 7.92 ( https://nmap.org/ncat )
Ncat: Listening on :::80
Ncat: Listening on 0.0.0.0:80
Ncat: Connection from 10.10.11.111.
Ncat: Connection from 10.10.11.111:38550.
GET /foo.png HTTP/1.1
Host: 10.10.14.8
User-Agent: python-requests/2.25.1
Accept-Encoding: gzip, deflate
Accept: */*
Connection: keep-alive
```

Subdomain enumeration

Wfuzz will reveal another subdomain:

```
> wfuzz -c -w
    ↪ ~/tools/wordlists/SecLists/Discovery/DNS/subdomains-top1million-5000.txt -u
    ↪ 'http://forge.htb' -H "Host: FUZZ.forge.htb" --hw 26
********************************************************
* Wfuzz 3.1.0 - The Web Fuzzer                         *
********************************************************

Target: http://forge.htb/
Total requests: 4989

=====================================================================
ID           Response   Lines    Word       Chars       Payload
=====================================================================

000000024:   200        1 L      4 W        27 Ch       "admin"

Total time: 0
Processed Requests: 4989
Filtered Requests: 4988
Requests/sec.: 0
```

So adding it to `/etc/hosts` and again look at the resulting page.

admin.forge.htb

[[Pasted image 20210922094923.png]]

So the idea is to leverage a vulnerablity at the upload from URL part to look at `admin.forge.htb` from internally.

[[Pasted image 20210922095028.png]]
